

Certified Radiation Devices

April 2017

Certified Radiation Devices

The Canadian Nuclear Safety Commission (CNSC) regulates the use of nuclear energy and materials to protect the health, safety and security of Canadians and the environment; and to respect Canada's international commitments on the peaceful use of nuclear energy.

The [*Nuclear Safety and Control Act*](#) empowers the CNSC to certify the use of radiation devices. The [*Nuclear Substances and Radiation Devices Regulations*](#) stipulate regulatory requirements for certification.

Examples of radiation devices that require certification by the CNSC include smoke detectors, fixed and portable nuclear gauges, emergency lighting, and radiography equipment.

A certificate issued by the CNSC for a device applies to a specific model design with precise operating conditions only. Any future changes to the design or use may require recertification of the radiation device.

What follows is the list of radiation devices that are certified by the CNSC for use in Canada as of April 3, 2017. Those highlighted in red color font will expire within the next 12 months. Those highlighted in blue color font indicate expired certificates for which an application for certification is pending a decision.

Radiation Device Certificates

Certificate Number	Radiation Device Description	Radiation Device Type	Issue Date	Expiry Date
R-001-0001-1-2017	NDC Technologies, Inc. IRMS TG-2	Fixed gauge	2016-10-24	2017-06-30
R-005-0001-1-2020	MDS Nordion GammaMat TSI 5/1 <i>Refer to R-526-0006-1-2028</i>	Exposure device – cable	2007-11-16	2020-01-31
R-005-0008-0-2025	MDS Nordion GammaMat M10-1	Exposure device – crawler	2010-11-26	2025-11-30
