

ERRATUM

Minutes of the Canadian Nuclear Safety Commission
Meeting held on Tuesday December 8, 2020

On Tuesday December 8, 2020, the Canadian Nuclear Safety Commission held a public meeting on the matters set out in the [agenda CMD 20-M40.A](#), including the [Regulatory Oversight Report on Uranium and Nuclear Processing Facilities in Canada: 2019](#). The meeting was held virtually and broadcasted on the [CNSC website](#).

In April 2021, CNSC staff submitted [CMD 21-M25](#)¹ to clarify statements made during the December meeting in response to a question from the Commission regarding the regulatory requirements for the transport of natural uranium hexafluoride (UF6) in Canada. CNSC staff's original statements are reflected in paragraph 41 of the [meeting minutes](#). The corrected paragraph should read:

41. On UF6 transportation, CNSC staff indicated that packages were designed to survive a transport accident, such as a collision. CNSC staff added that the security of the shipments was fully addressed in the transport of this material.

Marc A. Leblanc
Commission Secretary
June 15, 2021

¹ CMD 21-M25 was presented and accepted at the June 8, 2021 Commission meeting.
